

Jacqueline Koller

Jr. Frontend developer

As a seasoned self-employed tattoo artist turned passionate frontend developer, I bring a vibrant mix of creativity, adaptability, and technical prowess to the table. My coding journey started with computer science studies, but my zest for innovation led me to tattooing. Now, armed with a unique blend of artistic flair and coding skills, I am eager to contribute my passion, client-focused mindset, and a proven track record of delivering exceptional, personalized experiences to your dynamic team. Let's craft the future together!

Experience

○ 2019 - 2024

Self-employed

Tattooartist

Key Skills and Attributes:

- **Artistic Vision:** Developed a strong sense of visual aesthetics and design principles through years of crafting unique and personalized tattoo art.
- **Client-Centric Approach:** Nurtured excellent communication skills by collaborating closely with clients to understand their visions and preferences, ensuring satisfaction and building lasting relationships.
- **Adaptability:** Thrived in a dynamic and evolving industry, staying abreast of trends and technologies to continuously improve and innovate my craft.
- **Detail-Oriented:** Cultivated a meticulous approach to work, emphasizing precision and attention to detail to deliver high-quality, personalized creations.

○ 2017 - 2020

Fachhochschule Hannover

Computer Science

Originally studied computer science, driven by a passion for coding. However, the structured nature of the field left me longing for more creative expression. Despite my love for coding, I craved a space where I could merge technical skills with artistic vision. Opting for a bold shift, I left the university and ventured into the world of tattoo artistry. While honing my creative prowess, I never lost my affection for coding, and now, with a rich blend of artistic and technical skills, I am excited to re-enter the world of programming as a frontend developer.
